polis in plural poleis is the word the ancient greeks used to describe their principal type of state and community and the most common of all nouns in ancient greek in archaic and classical sources there are over 11 000 attestations of the word and they show that it was used in two different senses 1 town sometimes including the hinterland and 2 state sometimes including the territory often it carries both senses simultaneously and denotes both the state and its urban centre the copenhagen polis centre 1993 2005 conducted a number of investigations into the use and meanings of the term polis in all archaic and classical sources to find out what the greeks thought a polis was the present volume is a thoroughly revised and updated comprehensive publication of all these studies to which four new studies have been added they show that the two different meanings of the word polis are connected through their reference with very few exceptions every polis town was the urban centre of a polis state and conversely virtually every polis state had an urban centre called a polis in the sense of town
