society today faces a difficult contradiction we know exactly how the physical limits of our planet are being reached and exactly why we cannot go on as we have before and yet collectively we seem unable to reach crucial decisions for our future in a timely way this book argues that our definition of prosperity which we have long assimilated with the idea of material wealth may be preventing us from imagining a future that meets essential human aspirations without straining our planet to the breaking point in other words redefining prosperity is a necessary and urgent task this book is the fruit of a long debate among 15 scholars from diverse fields who worked together to bring the depth and nuance of their respective fields to questions that affect us all the result is a rich transdisciplinary work that illuminates the philosophical and historical origins of our current definition of prosperity identifies the complex processes that gave rise to the problems we face today elucidates the ways in which our contemporary environmental social nutritional economic political and cultural crises are interconnected and explores why a half century of economic growth has neither increased life satisfaction in the west nor vanquished world poverty approaching these broad ranging questions from the specific standpoints of their disciplines each of the authors offers thoughts for the future considering possible escape routes

and proposing changes to the way we live behave and organise society and public action changes that actually respond in an equitable way to our deepest aspirations ultimately in laying the groundwork for a public debate on this subject this book poses a question to its readers what is your definition of prosperity and what can be done to promote it

it is perfectly logical to assume that a wise and competent creator would provide for the needs of his creatures in their various stages of growth the supply would be given as required and as the necessary effort for its appropriation was made by the creature temporal needs would be met by temporal things mental needs by things of like character and spiritual needs by spiritual elements for simplification of distribution all would be composed of one primal spiritual substance which under proper direction could be transformed into all products at the will of the operator this is a crude yet true illustration of the underlying principles on which the human family is supplied on this earth the father has provided a

universal seed substance that responds with magical power to the active mind of man faith in the increasing capacity of this seed substance whether wrapped in visible husks or latent in invisible electrical units always rewards man with the fruits of his labor in the lessons of this book it is attempted to explain man s lawful appropriation of the supplies spiritually and electrically provided by god when we understand and adjust our mind to the realm or kingdom where these rich ideas and their electrical thought forms exist we shall experience in our temporal affairs what is called prosperity

Is Our Prosperity a Delusion?

1864

we live in an age of economic paradox the dynamism of america s economy is astounding the country s industries are the most productive in the world and spin off new products and ideas at a bewildering pace yet americans feel deeply uneasy about their economic future the reason paul osterman explains is that our recent prosperity is built on the ruins of the once reassuring postwar labor market workers can no longer expect stable full time jobs and steadily rising incomes instead they face stagnant wages layoffs rising inequality and the increased likelihood of merely temporary work in securing prosperity osterman explains in clear accessible terms why these changes have occurred and lays out an innovative plan for new economic institutions that promises a more secure future osterman begins by sketching the rise and fall of the postwar labor market showing that firms have been the driving force behind recent change he draws on original surveys of nearly 1 000 corporations to demonstrate that firms have reorganized and downsized not just for the obvious reasons technological advances and shifts in capital markets but also to take advantage of new team oriented ways of working we can t turn the clock back osterman writes since that would strip firms of the ability to compete but he also argues that we should not simply give ourselves up to the mercies of the market osterman argues that new policies must engage on two fronts addressing both higher rates of mobility in the labor market and a major shift in the balance of power against employees to deal with greater mobility osterman argues for portable benefits a stronger unemployment insurance system and new labor market intermediaries to help workers navigate the labor market to redress the imbalance of power osterman assesses the possibilities of reforming corporate governance but concludes the best approach is to promote countervailing power through innovative unions and creative strategies for organizing employee voice

in communities osterman gives life to these arguments with numerous examples of promising institutional experiments

within the framework of an increasingly troubled world this manuscript presents a series of essays written over a twenty year period offering some practical non partisan suggestions as to how our country and other countries like it can pull together to improve the situations of our citizens our nation and our communities the book suggests that the solutions to the problems we face do not fit neatly into any one political camp but instead require innovation system redesign and fair mindedness on the part of both politicians and citizens informed world citizens are demanding far more objective analyses of

our policies our actions and the values we employ in pursuing the policies we do should those of us in leadership fail to provide those valuable insights the world is likely to deprive us of our leadership role the title from riches to rags at a time of prosperity was purposely chosen there is still time for us to modify our behavior but if we misread or ignore world events we will be poorer as the time available for improvement is quite finite the united states is currently the world s largest debtor by a substantial margin our prosperity is largely based on the rapid depletion of liquid fossil fuels which are likely to be virtually fully exhausted this century our education system is sub par our retirement promises are vastly in excess of what we can afford our environment is eroding though most us citizens are comparatively prosperous at the moment we are gradually transitioning to much less prosperous circumstances from riches to rags at a time of prosperity the book is divided into eight major parts the introduction includes a brief history of some of the earlier writings in the field of management with particular emphasis on our responsibilities as managers part two deals with the economy and what we may have to do to sustain prosperity for the world s citizens part three includes some essays written in response to the euphoria of the stock markets part four deals with manufacturing and its role in an integrated society part five discusses the role of business management in a wholesome society along with some suggestions and caveats for the practice of management part six reviews the importance of education and the responsibilities of those of us who are educators part seven deals with a few of the nation s pressing public policy questions part eight closes with a question will real leadership emerge
