this book discusses stuart hall s unique contribution to criminology it suggests that this is captured best in hall s commitment to understanding a given historical moment or conjuncture in its full complexity and his continuous deployment of an appropriate methodology conjunctural analysis to do so this provides a running thread linking hall s early work on youth subcultures the media the state and hegemony to his later work on racial identities racism and the politics of difference this is contrasted with more theoretically driven work in cultural criminology its failure to adopt a conjunctural approach constitutes for the author something of a missed moment to demonstrate the continuing relevance of this form of analysis the book provides a conjunctural analysis of brexit including its psychosocial dimension and concludes with a brief analysis of trump s failure to get re elected the book is intended for students of criminology and cultural studies

this title was first published in 2000 an investigation of the performance of the electric power and telecommunication sectors of pakistan at the firm level as well as the sector as a whole seeking to identify and quantify the extent of inefficiencies since physical or financial or productivity indicators alone are not able to explain the duality of public infrastructure purposes the financial and

productivity indicators have been used in evaluating the performance of these sectors further a cobb douglas production function has also been used to calculate the trend in the growth of total factor productivity economies of scale have also been studied in the case of electric power generation the results of the study show that in pakistan one of the usual motives for privatization to avoid the poor financial results of state enterprises is not relevant for electricity and telecommunications enterprises this however appears to be due to the financial subsidies they received through access to low cost loan finance and grants rather than to their efficiency in operations by the economic criteria of growth of tfp none of the enterprises do well and two have a negative tfp growth the case for reforming these enterprises is strong and alternative modes of organization finance and ownership need to be considered

this book examines several thousand examples of tense aspect stem participles in the rigveda and the passages in which they appear in terms of both their syntax and semantics the rigveda is an ancient collection of sacred indian hymns written in vedic sanskrit and is one of the oldest extant texts in any indo european language it is also a poetic text in which deliberate obscurity is the governing aesthetic and in which the rules of language are pushed to their limits in order to produce the ideal poetic expression many vedic sentences are of controversial disputed meaning and vedic scholarship is thus fraught with controversy john j lowe applies formal linguistic analysis to the data and produces a comprehensive formal model of how participles are used the author uses his findings to recategorize the data by defining certain stems and stem types as outside the synchronic category of participle on the basis of their syntactic and semantic properties he suggests alternative sources for these forms and considers the linguistic processes that transformed old participles into non participial entities in his conclusion he reassesses the category of participles within the verbal and nominal systems looks at their prehistory in proto indo european and describes their universal typological characteristics among his conclusions are that tense aspect stem participles have the technical properties of adjectival verbs not verbal adjectives and that such participles are not fully dependent on corresponding finite verbal forms that is a perfect participle for example need not share all the semantic and functional features of the finite perfect forms built to the same stem these and many other conclusions drawn either directly challenge or radically revise received opinion and recent work
