The Winning Investor's Guide to Making Money in Any Market 1875, illustrated by S. R. Wilkerson in the United States. Where we have more land than people, it is not at all difficult for persons in good health to make money in this comparatively new field. There are so many avenues of success open, so many vocations which are not crowded, that any person of either sex who is willing at least for the time being to engage in any respectable occupation that offers may find lucrative employment. Those who really desire to attain an independence have only to set their minds upon it and adopt the proper means, as they do in regard to any other object which they wish to accomplish, and the thing is easily done. But however easy it may be found to make money, I have no doubt many of my hearers will agree it is the most difficult thing in the world to keep it. The road to wealth is, as Dr. Franklin truly says, as plain as the road to the mill; it consists simply in expending less than we earn. That seems to be a very simple problem. Mr. Micawber, one of those happy creations of the genial Dickens, puts the case in a strong light when he says that to have an annual income of twenty pounds per annum and spend twenty pounds and sixpence is to be the most miserable of men, whereas to have an income of only twenty pounds and spend but nineteen pounds and sixpence is to be the happiest of mortals. Many of my readers may say we understand this. This is economy, and we know economy is wealth. We know we can't eat our cake and keep it, also. Yet I beg to say that perhaps more cases of failure arise from mistakes on this point than almost any other. The fact is many people think they understand economy when they really do not. True economy is misapprehended, and people go through life without properly comprehending what that principle is. One says, I have an income of so much, and here is my neighbor who has the same, yet every year he gets something ahead, and I fall short. Why is it? I know all about economy, he thinks he does, but he does not. There are men who think that economy consists in saving cheese parings and candle ends, in cutting off two pence from the laundress bill, and doing all sorts of little mean, dirty things. Economy is not meanness. The misfortune is also that this class of persons let their economy apply in only one direction. They fancy they are so wonderfully economical in saving a half penny where they ought to spend twopence, that they think they can afford to squander in other directions. A few years ago, before kerosene oil was discovered or thought of, one might stop overnight at almost any farmer's house in the agricultural districts and get a very good supper. But after supper he might attempt to read in the sitting room and would find it impossible with the inefficient light of one candle. The hostess, seeing his dilemma, would say it is rather difficult to read here. Evenings the proverb says you must have a ship at sea in order to be able to burn two candles at once. We never have an extra candle, except on extra occasions. These extra occasions occur perhaps twice a year. In this way the good woman saves five, six, or ten dollars in that time, but the information which might be derived from having the extra light would of course far outweigh a ton of candles.

Todd & Watt's Cases and Materials on Equity and Trusts 1889 on the origins of money is a discussion of the history of money and currency from its crudest form as cowrie shells animal pelts and salt in early societies to the coin and paper money we use today rather than focusing on the type or shape of the money author and economist carl menger looks at the reasons behind monetary exchange and why money is so valuable or where it gets its inherent value his argument centers on the saleableness of the goods or commodities being sold in other words the more saleable or valuable or in demand an item is the more money it is worth hence money gets its value from the objects it pays for this short work is an insightful look into the history and value of money for any student or professional economist
