midoriya inherits the superpower of the world's greatest hero but greatness won't come easy what would the world be like if 80 percent of the population manifested superpowers called quirks heroes and villains

would be battling it out everywhere being a hero would mean learning to use your power but where would you go to study the hero academy of course but what would you do if you were one of the 20 percent who were born quirkless the u a students have reached the practical portion of their final exam but they didn't expect to have to beat their own teachers in order to pass paired with his archrival bakugo midoriya has to try to take on none other than all might himself working with bakugo is one thing but is giving everything he's got to beat all might more than midoriya can handle and in a nearby arena yaoyorozu and todoroki endure a similar struggle meanwhile a sinister new adversary prepares to make a move

My Hero Academia 2017-05-02

Captain Celebrity and Koichi gave it all they had to hold off the explosive attacks set up by the mysterious High Speed Villain but now as the Sky Egg Stadium plunges earthward can anyone save the day and just who is the sinister speedster what is his connection to Knuckleduster? Koichi's mentor still has a lot of secrets he hasn't told anyone later Aizawa helps Koichi deal with a minor villain and the encounter triggers a memory from his youth VIZ Media

a lot of digital ink has been spilled on big data over the past few years most of this surge owes its origin to the various types of unstructured data in the wild among which the proliferation of text heavy data is particularly overwhelming attributed to the daily use of web documents business reviews news social posts etc by so many people worldwide a core challenge presents itself how can one efficiently and effectively turn massive unstructured text into structured representation so as to further lay the foundation for many other downstream text mining applications in this book we investigated one promising paradigm for

representing unstructured text that is through automatically identifying high quality phrases from innumerable documents in contrast to a list of frequent n grams without proper filtering users are often more interested in results based on variable length phrases with certain semantics such as scientific concepts organizations slogans and so on we propose new principles and powerful methodologies to achieve this goal from the scenario where a user can provide meaningful guidance to a fully automated setting through distant learning this book also introduces applications enabled by the mined phrases and points out some promising research directions
