

Free epub Freezing point of ethylene glycol solution Full PDF

ethylene glycol is a colorless, odorless, and non-toxic liquid. It is a diol with the chemical formula $C_2H_6O_2$ and the structural formula $HOCH_2CH_2OH$. It is commonly used as a coolant and antifreeze in automotive engines and industrial processes. The freezing point of ethylene glycol is approximately $-12.9^\circ C$ (9.0°F). It is also used in a variety of other applications, including as a solvent, a plasticizer, and a component in many consumer products.

ethylene glycol ch₂ohch₂oh or hoch₂ch₂oh or c₂h₆o₂ cid 174 structure chemical names physical and chemical properties classification patents literature biological activities safety hazards toxicity information supplier lists and more

ethylene glycol is the fluid that transports heat through the use of a geothermal heat pump the ethylene glycol either gains energy from the source lake ocean water well or dissipates heat to the sink depending on whether the system is being used for heating or cooling

ethylene glycol 1 2 ethanediol 1 2 dihydroxyethane

ethylene glycol the simplest member of the glycol family of organic compounds a glycol is an alcohol with two hydroxyl groups on adjacent carbon atoms a 1 2 diol the common name ethylene glycol literally means the glycol
