Patent Practice Skills & Strategies 2013 this workbook for the non-specialist describes how to write patent claims and how to understand and interpret claims of issued U.S. patents. The work includes a glossary of commonly used technical terms of patent law.

Rules of practice in the United States Patent Office in patent cases 1876 this book catalogs American writing instrument patents in the United States from the first such patent issued through 1910. Searchable by date, number, inventor, assignee, or location. Also included are full-page patent illustrations with accompanying commentary with respect to 84 of the most noteworthy patents from the era.

Rules of practice in the United States Patent Office in patent cases 1870 what is an invention? Are all inventions patented? Is an inventor someone who has patents issued? How are potential inventors identified? Industrial managers are constantly wondering how their company can build a better product and upstage their competition. They seek inventions. They wonder if there are fledgling inventors in their midst just waiting to receive that flash, that lightning bolt which will forever alter the future of mankind. During the past thirty-five years I've worked as an industrial manager and inventor averaging just over two U.S. patents per year. My failures outnumber my successes. Fortunately, my successes have far more than subsidized my failures. My bosses have been tops, always supportive, willing to carry me through the lean times, hoping that I will hit a home run. The purpose of this writing is to assure the reader that we are all inventors. There are no proven scales for measuring the potential for invention. Is there a test for babies to indicate who will accumulate wealth over their lifetime? Probably not. The same is true for inventing wealth. Accumulation and successful inventing are each directed by interest, effort, and opportunity. My interests and efforts were about average, but my opportunities were abundant. For easy reading, I have condensed various points, printing them in bold type and underlining some commentary. Each explains the inclusion of the bold statement. Finally, let me assure you that inventing is a game. It is show biz, technology, law, marketing, manufacturing, internationalism, and science rolled into one. If one has a streak of luck, it can be financially rewarding and personally satisfying.

Patent it Yourself 2002 looking to file your own provisional patent application? Provisional patents: inventor's guide to writing and filing your own application provides you with some simple advice about filing your own application.
