Advanced Intelligent Systems for Sustainable Development (AI2SD'2019) ***2020-01-03***

this book contains the latest researches on advanced intelligent systems applied in the field of education presented during the second edition of the international conference on advanced intelligent systems for sustainable development ai2sd 2019 held on july 08 11 2019 in marrakech morocco the book proposes new approaches and innovative strategies for the manipulation of data and big data collected from the educational environment exploiting the analysis tools algorithms of artificial intelligence and machine learning techniques in order to extract results which allow improving the performance and effectiveness of the education field which is a strategic lever for sustainable development the book deals with concepts strategies and approaches developed on various current axes of scientific research in the field of education such as smart e learning smart education smart classroom smart assessment and smart teaching and learning technologies massive open online courses mooc courseware design and development for smart learning cloud learning and mobile learning the book is intended for all actors in the educational sector namely students professors academic researchers and stakeholders it constitutes a large scale forum for the exchange of ideas approaches and innovative techniques between these actors on the development and innovation of the field of education with the revolution 4 0 the authors of each chapter report the state of the art of the various topics addressed and present results of their own research laboratory experiments and successful applications the purpose of this session is to share the idea of advanced intelligent systems with appropriate tools and techniques for modeling management and decision support in the field of education

JSL Vol 25-N6 2015-12-24

the journal of school leadership is broadening the conversation about schools and leadership and is currently accepting manuscripts we welcome manuscripts based on cutting edge research from a wide variety of theoretical perspectives and methodological orientations the editorial team is particularly interested in working with international authors authors from traditionally marginalized populations and in work that is relevant to practitioners around the world growing numbers of educators and professors look to the six bimonthly issues to deal with problems directly related to contemporary school leadership practice teach courses on school leadership and policy use as a quality reference in writing articles about school leadership and improvement

Information Design Unbound 2023-10-05

as everyday tasks grow more confusing and as social and global problems grow more complex the information designer s role in bringing clarity has reached a new level of importance in order to have a positive impact they must go beyond conventional approaches to uncover real needs make insightful connections and develop effective solutions information design unbound provides a clear engaging introduction to the field and prepares students to be strategic thinkers and visual problem solvers who can confidently make sense in a changing world sheila pontis and michael babwahsingh present a holistic view of information design synthesizing decades of research cross disciplinary knowledge and emerging practices the book opens by laying a foundation in the field first painting the bigger picture of what it is and how it originated before explaining the scientific and cultural dimensions of how people perceive and understand visual information a discussion of professional practices ethical considerations and the expanding scale of challenges sheds light on the day to day work of information designers today detailed chapters then delve into the four areas that are integral to all types of information design work visual thinking research sensemaking and design the final section of the book puts everything together with detailed project walk throughs in areas such as icon design instructions wayfinding organizational strategy and healthcare system change written and designed with students needs in mind this book brings information design fundamentals to life exercises allow students to put lessons directly into practice case studies demonstrate how information designers think and work and generous illustrations clarify concepts in a visually engaging way information design unbound helps beginning designers build the mindset and skillset to navigate visual communication challenges wherever they may arise

Advances in Information Systems 2003-06-26

this volume contains the proceedings of the first international conference on advances in information systems advis held in izmir turkey 25 27 october 2000 this conference was dedicated to the memory of professor esen ozkarahan he was great researcher who made an essential contribution to the development of information systems this conference was organized by the computer gineering department of dokuz eylul university of izmir this department was established in 1994 by the founding chairman professor ozkarahan and there he worked for the last ve years of his live the main goal of the conference was to bring together researchers from all around the world working in di erent areas of information systems to share new ideas and to represent their latest results we received 80 submissions from 30 countries the program committee selected 44 papers for presentation at the conference the invited and accepted

contributions cover a large variety of topics neral aspects of information systems data bases data warehousing computer networks internet technologies content based image retrieval information trieval constraint programming and arti cial intelligence the success of the conference was dependent upon the hard work of a large number of people we gratefully acknowledge the members of the program c mittee who helped to coordinate the process of refereeing all submitted papers we also thank all the other specialists who reviewed the papers

this book constitutes revised selected papers from the 6th international conference on information systems logistics and supply chains ils 2016 held in bordeaux france in june 2016 the conference deals with topics related to supply chain design and management information and decision making systems and innovative practices in logistics it also encompasses issues such as sustainability societal impact uncertainty and collaboration in supply chain management the 13 full papers presented were carefully reviewed and selected for inclusion in this volume and reflect the diverse challenges and opportunities experienced in logistics information and supply chain management they were organized in topical sections named transportation and logistics supply chain planning collaboration and operations in supply chain and applications of supply chain topics to business environments case studies

Jsl Vol 17-N6 2008-10-09

in this important new book stephanie pace marshall argues that by focusing on reforming the contents of schooling and not transforming the context and conditions of learning we have created false proxies for learning and eroded the

potentially vibrant intellectual life of our schools finishing a course and a textbook has come to mean achievement listening to a lecture has come to mean understanding getting a high score on a standardized test has come to mean proficiency credentialing has come to mean competence to educate our children wisely requires that we create generative learning communities by design such learning communities have their roots in meaning not memory engagement not transmission inquiry not compliance exploration not acquisition personalization not uniformity interdependence not individualism collaboration not competition and trust not fear

Towards Improved Forecasting of Volcanic Eruptions 2020-04-01

this book constitutes the thoroughly refereed extended postproceedings of the 6th international workshop on membrane computing wmc 2005 held in vienna austria in july 2005 the 20 revised full papers presented together with 5 invited papers went through two rounds of reviewing and improvement the papers in this volume cover all the main directions of research in membrane computing ranging from theoretical topics in mathematics and computer science to application issues especially in biology more specifically these papers present research on topics such as computational power and complexity classes new types of p systems relationships to petri nets quantum computing and brane calculi determinism vs nondeterminism hierarchies the size of small families algebraic approaches and designing polynomial solutions to np complete problems through the use of membrane systems

The Power to Transform 2006-03-10

this book provides an overview of the challenges in electronic health records ehr design and implementation along with an introduction to the best practices that have been identified over the past several years the book examines concerns surrounding ehr use and proposes eight examples of proper ehr use it discusses the complex strategic planning that accompanies the systemic organizational changes associated with ehr programs and highlights key lessons learned regarding health information including technology errors and risk management concerns

JSL Vol 22-N6 2012-11-07

starting from the economic modelling of the organization this innovative book proposes a mapping of all types conventional and abc of cost systems currently in use design and relevance are formalized using a short list of parameters the theoretical proposition is illustrated through 19 systems built on a unique database

Jsl Vol 16-N6 2007-03-12

dr richard polin s neonatology questions and controversies series highlights the toughest challenges facing physicians and care providers in clinical practice offering trustworthy guidance on up to date diagnostic and treatment options in the field in each volume renowned experts address the clinical problems of greatest concern to today s practitioners helping you handle difficult practice issues and provide optimal evidence based care to every patient the thoroughly updated full color 4th edition of the newborn lung provides a clear management strategy for reducing lung damage and long term sequelae in extremely premature infants offering guidance based on the most up to date understanding of underlying pathophysiology places emphasis on controversial areas that can entail different approaches features the most current clinical information throughout with an emphasis on those areas where there have been major new developments in recent years includes new chapters on perinatal nutrition and the lung caffeine respiratory stimulant or magic bullet lung ultrasound and electrical impedance tomography new lung imaging techniques ct mri and other modalities alveolar homeostasis and chronic lung disease and fetal intervention in congenital

malformations of the respiratory system utilizes a consistent chapter organization to help you find information quickly and easily and contains numerous charts graphs radiographic images and photographs throughout offers the most authoritative advice available from world class neonatologists who share their knowledge of new trends and developments in neonatal care any additional digital ancillary content may publish up to 6 weeks following the publication date purchase each volume individually or get the entire 7 volume neonatology questions and controversies set which includes online access that allows you to search across all titles gastroenterology and nutrition hematology and transfusion medicine neonatal hemodynamics infectious disease immunology and pharmacology renal fluid and electrolyte disorders neurology the newborn lung

Jsl Vol 20-N6 2011-01-16

are you ready to master java programming through hands on practice dive into the world of java with hands on java practical exercises for programmers a comprehensive guide designed to elevate your skills through a series of engaging exercises this book is tailored for programmers at all levels whether you re just starting your journey in java or looking to enhance your proficiency each exercise is thoughtfully designed to encompass fundamental java concepts spanning from foundational syntax to advanced topics by working through these exercises you will not only strengthen your understanding of java but also gain practical experience in solving real world programming challenges
