this open access textbook offers a practical guide into research ethics for undergraduate students in the social sciences a step by step approach of the most viable issues in depth discussions of case histories and a variety of didactical tools will aid the student to grasp the issues at hand and help him or her develop strategies to deal with them this book addresses problems and questions that any bachelor student in the social sciences should be aware of including plagiarism data fabrication and other types of fraud data augmentation various forms of research bias but also peer pressure issues with confidentiality and questions regarding conflicts of interest cheating free riding and broader issues that relate to the place of the social sciences in society are also included the book concludes with a step by step approach designed to coach a student through a research application process data management technology is rapidly progressing and with it comes the need for stricter rules that ensure the information being collected is handled appropriately ensuring research integrity and the ethical management of data is an essential resource that examines the best approaches for providing quality research as well as how to effectively manage that information in a reputable way featuring extensive research on relevant topics such as qualitative data collection data sharing data misinterpretation and intellectual property this scholarly publication is an ideal reference source for academicians students and researchers interested in current trends and techniques in ethical research and data management includes section recent book acquisitions varies recent united states publications formerly published separately by the u s army medical library economic growth is highly dependent on technological progress and innovation yet the sources from which these innovations originate are still largely misunderstood and untapped recent research has demonstrated that users rather than manufacturers are often a critical source of innovation in numerous fields from extreme sports to medical devices to software this book systematically identifies the most important barriers to user innovation and critically evaluates the democratization of innovation argument by critically assessing the main legal economic technological and societal barriers to user innovation for the first time and proposing alternative possibilities through original research the author reveals the dynamics of user innovation and offers strategies for minimizing those factors that inhibit and stifle the spread of this phenomenon from this analysis it becomes clear that user innovation has become more difficult over time and that the problem is now of how manufacturers can enable users to overcome the discussed barriers and simultaneously benefit from such consumer driven activities arguing that licenses are not just an important technology commercialization instrument but are tools critical to generating innovations the author explains how licenses can in certain situations be employed to help users overcome some of the barriers to user innovation user innovation barriers to democratization and ip licensing is a practical guidebook as well as a startlingly original work of scholarship that will be essential reading for years to come while education researchers have drawn on the work of a wide diversity of theorists over the years much contemporary theory building in these areas has revolved around the work of pierre bourdieu theory as method in research develops the capacity of students researchers and teachers to successfully put bourdieu s ideas to work in their own research and prepare them effectively for conducting masters and doctoral scholarships structured around four core themes this book provides a range of research case studies exploring educational identities educational inequalities school leadership and management and research in teacher education issues as diverse as chinese language learning and identity school leadership in australia and the school experience of afro trinidadian boys are covered intertwined with a set of innovative approaches to theory application in education research this collection brings together in one comprehensive volume a set of education researchers who place pierre bourdieu s key concepts such as habitus capital and field at the centre of their research methodologies full of insight and innovation the book is an essential read for practitioners student teachers researchers and academics who want to harness the potential of bourdieu s core concepts in their own work thereby helping to bridge the gap between theory and method in education research anyone who writes verse whether lyric poet songwriter or composer of limericks or

jingles will find the penguin rhyming dictionary an indispensable reference companion clearly arranged and easy to use it offers an astonishingly wide range of suggestions for rhyming words from the common and everyday to the more difficult and obscure unlike many of its predecessors it is not merely organized according to the spelling of words but is based on phonetic principles hence rhymes such as trite indict and fahrenheit can be found together in the one group whereas words such as bough cough and rough are not falsely forced together several recent papers underline methodological points that limit the validity of published results in imaging studies in the life sciences and especially the neurosciences carp 2012 ingre 2012 button et al 2013 ioannidis 2014 at least three main points are identified that lead to biased conclusions in research findings endemic low statistical power and selective outcome and selective analysis reporting because of this and in view of the lack of replication studies false discoveries or solutions persist to overcome the poor reliability of research findings several actions should be promoted including conducting large cohort studies data sharing and data reanalysis the construction of large scale online databases should be facilitated as they may contribute to the definition of a collective mind fox et al 2014 facilitating open collaborative work or crowd science franconi and sauermann 2014 although technology alone cannot change scientists practices wicherts et al 2011 wallis et al 2013 poldrack and gorgolewski 2014 roche et al 2014 technical solutions should be identified which support a more open science approach also the analysis of the data plays an important role for the analysis of large datasets image processing pipelines should be constructed based on the best algorithms available and their performance should be objectively compared to diffuse the more relevant solutions also provenance of processed data should be ensured mackenzie graham et al 2008 in population imaging this would mean providing effective tools for data sharing and analysis without increasing the burden on researchers this subject is the main objective of this research topic rt cross listed between the specialty section computer image analysis of frontiers in ict and frontiers in neuroinformatics firstly it gathers works on innovative solutions for the management of large imaging datasets possibly distributed in various centers the paper of danso et al describes their experience with the integration of neuroimaging data coming from several stroke imaging research projects they detail how the initial neurogrid core metadata schema was gradually extended for capturing all information required for future metaanalysis while ensuring semantic interoperability for future integration with other biomedical ontologies with a similar preoccupation of interoperability shanoir relies on the ontoneurolog ontology temal et al 2008 gibaud et al 2011 batrancourt et al 2015 a semantic model that formally described entities and relations in medical imaging neuropsychological and behavioral assessment domains the mechanism of study card allows to seamlessly populate metadata aligned with the ontology avoiding fastidious manual entrance and the automatic control of the conformity of imported data with a predefined study protocol the ambitious objective with the biomist platform is to provide an environment managing the entire cycle of neuroimaging data from acquisition to analysis ensuring full provenance information of any derived data interestingly it is conceived based on the product lifecycle management approach used in industry for managing products here neuroimaging data from inception to manufacturing shanoir and biomist share in part the same ontoneurolog ontology facilitating their interoperability archimed is a data management system locally integrated for 5 years in a clinical environment not restricted to neuroimaging archimed deals with multi modal and multi organs imaging data with specific considerations for data long term conservation and confidentiality in accordance with the french legislation shanoir and archimed are integrated into fli iam1 the national french it infrastructure for in vivo imaging this book is a printed edition of the special issue non alcoholic fatty liver disease research 2016 that was published in ijms includes information from the checklist of official publications of the state of new york includes entries for maps and atlases presenting a comprehensive survey of the telecommunications industry in japan taplin and wakui cover the different sectors of the industry including mobile broadband and satellite whilst considering key questions such as the structure and economics of the industry government policy and international relations issues connected to the industry the volume brings together unique analysis by renowned experts in the telecommunications field one major overall problem is that unlike many other industries japan has lagged behind other countries in telecommunications japanese telecommunications considers why this should be so showing how far this is attributable to an unmodernized

industry structure and assessing the measures being taken to address the problem after over a decade of struggle japan has recorded rapid uptake of broadband and japanese advanced mobile services have become increasingly successful on a global scale japan has also undergone regulatory reform and competition policy is now given top priority by government taplin and wakui examine the most recent developments and provide signposts for the future research based spin off companies are a special subgroup of new technology based ventures and play an important role for innovation and economic development executive teams of academic spin offs face several challenges in building up sustainable and profitable ventures because they often lack managerial and entrepreneurial skills based on a quantitative analysis of 193 german spin offs rigotietz examines the relationships between executive team characteristics strategic decision making and firm performance the study contributes to the entrepreneurship and strategic management literature and has practical implications for entrepreneurs and managers policymakers and practitioners of start up initiatives and technology transfer organisations this book constitutes the refereed proceedings of the 16th annual international conference on research in computational molecular biology recomb 2012 held in barcelona spain in april 2012 the 31 revised full papers presented together with 5 keynote lectures were carefully reviewed and selected from 200 submissions the papers feature current research in all areas of computational molecular biology including molecular sequence analysis recognition of genes and regulatory elements molecular evolution protein structure structural genomics analysis of gene expression biological networks sequencing and genotyping technologies drug design probabilistic and combinatorial algorithms systems biology computational proteomics structural and functional genomics information systems for computational biology and imaging

Commercial Fisheries Review 1964

this open access textbook offers a practical guide into research ethics for undergraduate students in the social sciences a step by step approach of the most viable issues in depth discussions of case histories and a variety of didactical tools will aid the student to grasp the issues at hand and help him or her develop strategies to deal with them this book addresses problems and questions that any bachelor student in the social sciences should be aware of including plagiarism data fabrication and other types of fraud data augmentation various forms of research bias but also peer pressure issues with confidentiality and questions regarding conflicts of interest cheating free riding and broader issues that relate to the place of the social sciences in society are also included the book concludes with a step by step approach designed to coach a student through a research application process

A Study of the License Laws in Eighteen Selected States 1929

data management technology is rapidly progressing and with it comes the need for stricter rules that ensure the information being collected is handled appropriately ensuring research integrity and the ethical management of data is an essential resource that examines the best approaches for providing quality research as well as how to effectively manage that information in a reputable way featuring extensive research on relevant topics such as qualitative data collection data sharing data misinterpretation and intellectual property this scholarly publication is an ideal reference source for academicians students and researchers interested in current trends and techniques in ethical research and data management

Popular Electronics 1980

economic growth is highly dependent on technological progress and innovation yet the sources from which these innovations originate are still largely misunderstood and untapped recent research has demonstrated that users rather than manufacturers are often a critical source of innovation in numerous fields from extreme sports to medical devices to software this book systematically identifies the most important barriers to user innovation and critically evaluates the democratization of innovation argument by critically assessing the main legal economic technological and societal barriers to user innovation for the first time and proposing alternative possibilities through original research the author reveals the dynamics of user innovation and offers strategies for minimizing those factors that inhibit and stifle the spread of this phenomenon from this analysis it becomes clear that user innovation has become more difficult over time and that the problem is now of how manufacturers can enable users to overcome the discussed barriers and simultaneously benefit from such consumer driven activities arguing that licenses are not just an important technology commercialization instrument but are tools critical to generating innovations the author explains how licenses can in certain situations be employed to help users overcome some of the barriers to user innovation user innovation barriers to democratization and ip licensing is a practical guidebook as well as a startlingly original work of scholarship that will be essential reading for years to come

Research Ethics for Students in the Social Sciences

2020-10-16

while education researchers have drawn on the work of a wide diversity of theorists over the years much contemporary theory building in these areas has revolved around the work of pierre bourdieu theory as method in research develops the capacity of students researchers and teachers to successfully put bourdieu s ideas to work in their own research and prepare them effectively for conducting masters and doctoral scholarships structured around four core themes this book provides a range of research case studies exploring educational identities educational inequalities school leadership and management and research in teacher education issues as diverse as chinese language learning and identity school leadership in australia and the school experience of afro trinidadian boys are covered intertwined with a set of innovative approaches to theory application in education research this collection brings together in one comprehensive volume a set of education researchers who place pierre bourdieu s key concepts such as habitus capital and field at the centre of their research methodologies full of insight and innovation the book is an essential read for practitioners student teachers researchers and academics who want to harness the potential of bourdieu s core concepts in their own work thereby helping to bridge the gap between theory and method in education research

Agricultural Economics Research 1977

anyone who writes verse whether lyric poet songwriter or composer of limericks or jingles will find the penguin rhyming dictionary an indispensable reference companion clearly arranged and easy to use it offers an astonishingly wide range of suggestions for rhyming words from the common and everyday to the more difficult and obscure unlike many of its predecessors it is not merely organized according to the spelling of words but is based on phonetic principles hence rhymes such as trite indict and fahrenheit can be found together in the one group whereas words such as bough cough and rough are not falsely forced together

presenting a comprehensive survey of the telecommunications industry in japan taplin and wakui cover the different sectors of the industry including mobile broadband and satellite whilst considering key questions such as the structure and economics of the industry government policy and international relations issues connected to the industry the volume brings together unique analysis by renowned experts in the telecommunications field one major overall problem is that unlike many other industries japan has lagged behind other countries in telecommunications japanese telecommunications considers why this should be so showing how far this is attributable to an unmodernized industry structure and assessing the measures being taken to address the problem after over a decade of struggle japan has recorded rapid uptake of broadband and japanese advanced mobile services have become increasingly successful on a global scale japan has also undergone regulatory reform and competition policy is now given top priority by government taplin and wakui examine the most recent developments and provide signposts for the future

Driver Licensing: a Bibliography 1976

research based spin off companies are a special subgroup of new technology based ventures and play an important role for innovation and economic development executive teams of academic spin offs face several challenges in building up sustainable and profitable ventures because they often lack managerial and entrepreneurial skills based on a quantitative analysis of 193 german spin offs rigotietz examines the relationships between executive team characteristics strategic decision making and firm performance the study contributes to the entrepreneurship and strategic management literature and has practical implications for

entrepreneurs and managers policymakers and practitioners of start up initiatives and technology transfer organisations

Research Reporting Series 1972

this book constitutes the refereed proceedings of the 16th annual international conference on research in computational molecular biology recomb 2012 held in barcelona spain in april 2012 the 31 revised full papers presented together with 5 keynote lectures were carefully reviewed and selected from 200 submissions the papers feature current research in all areas of computational molecular biology including molecular sequence analysis recognition of genes and regulatory elements molecular evolution protein structure structural genomics analysis of gene expression biological networks sequencing and genotyping technologies drug design probabilistic and combinatorial algorithms systems biology computational proteomics structural and functional genomics information systems for computational biology and imaging
