examines the effects of the spanish mission system on population structure and genetic variability in indigenous communities in northern florida and southern georgia during the 16th and 17th centuries this book examines the effects of the spanish mission system on population structure and genetic variability in indigenous communities living in northern florida and southern georgia during the 16th and 17th centuries data on tooth size were collected from 26 archaeological samples representing three time periods late precontact 1200 1500 early mission 1600 1650 and late mission 1650 1700 and were subjected to a series of statistical tests evaluating genetic variability predicted changes in phenotypic population variability are related to models of group interaction population demography and genetic admixture as suggested by ethnohistoric and archaeological data results suggest considerable differences in diachronic responses to the mission environment for each cultural province the apalachee demonstrate a marked increase in variability while the guale demonstrate a decline in variability demographic models of population collapse are therefore inconsistent with predicted changes based on population geneticsl and the determinants of population structure seem largely local in nature this book highlights the specificity with which indigenous communities responded to european contact and the resulting transformations in their social worlds

the forgotten centuries draws together seventeen essays in which historians archaeologists and anthropologists attempt for the first time to account for approximately two centuries that are virtually missing from the history of a large portion of the american south using the chronicles of the spanish soldiers and adventurers the contributors survey the emergence and character of the chiefdoms of the southeast in addition they offer new scholarly interpretations of the expeditions of lucas vasquez de ayllon from 1521 to 1526 panfilo de narvaez in 1528 and most particularly hernando de soto in 1539 43 as well as several expeditions conducted between 1597 and 1628 the essays in this volume address three other connected topics describing some of the major chiefdoms apalachee the oconee province cofitachequi and coosa the essays undertake to lay bare the social principles by which they operated they also explore the major forces of structural change that were to transform the chiefdoms disease and depopulation the spanish mission system and the english deerskin and slave trades and finally they examine how these forces shaped the history of several subsequent southeastern indian societies including the apalachees powhatans creeks and choctaws these societies the so called native societies of the old south were in fact new ones formed in the crucible fired by the economic expansion of the early modern world

covering 92 million acres from virginia to texas the longleaf pine ecosystem was in its prime one of the most extensive and biologically diverse ecosystems in north america today these magnificent forests have declined to a fraction of their original extent threatening such species as the gopher tortoise the red cockaded woodpecker and

the venus fly trap conservationists have proclaimed longleaf restoration a major goal but has it come too late in looking for longleaf lawrence s earley explores the history of these forests and the astonishing biodiversity of the longleaf ecosystem drawing on extensive research and telling the story through first person travel accounts and interviews with foresters ecologists biologists botanists and landowners for centuries these vast grass covered forests provided pasture for large cattle herds in addition to serving as the world s greatest source of naval stores they sustained the exploitative turpentine and lumber industries until nearly all of the virgin longleaf had vanished looking for longleaf demonstrates how in the twentieth century forest managers and ecologists struggled to understand the special demands of longleaf and to halt its overall decline the compelling story earley tells here offers hope that with continued human commitment the longleaf pine might not just survive but once again thrive
