research this is it is a unique textbook that offers an integrated discussion of quantitative and qualitative research the theory is easily accessible with appealing examples taken from all kinds of studies this textbook light heartedly describes the essence of quantitative and qualitative research in four steps in a such a way that students will want to do the research presented in the book step 1 formulating the problem step 2 the research design step 3 collecting data step 4 processing analysing and reporting research data with these steps you have a valuable checklist at your disposal for designing and conducting your own research and for evaluating research proposals and reports excel is used for quantitative data analysis in addition the book has an appendix explaining how to use spss

Multiword expressions in lexical resources 2024-06-17

this volume contains chapters that paint the current landscape of the multiword expressions mwe representation in lexical resources in view of their robust identification and computational processing both large size general lexica and smaller mwe centred ones are included with special focus on the representation decisions and mechanisms that facilitate their usage in natural language processing tasks the presentations go beyond the morpho syntactic description of mwes into their semantics one challenge in representing mwes in lexical resources is ensuring that the variability along with extra features required by the different types of mwes can be captured efficiently in this respect recommendations for representing mwes in mono and multilingual computational lexicons have been proposed these focus mainly on the syntactic and semantic properties of support verbs and noun compounds and their proper encoding thereof
