the internet has often been labeled a disruptive technology and nowhere has that been more clearly the case than in the field of intellectual property ip law although debates over ip policy have raged in academic circles and law and economics journals for decades with the rise of the internet ip issues have captured the public s collective attention like never before suddenly the teenage creator of file swapping sensation napster appeared on the cover of time magazine as the mass media took notice of an explosion of interest in digital downloads cd burning and widespread peer to peer file sharing among the general public but the mass movement to share songs and other digital content online was met with a firestorm of criticism from copyright and patent holders who struck back with a vengeance filing lawsuits and pursuing legislative and regulatory remedies for what they regarded as intellectual property piracy on a scale never before envisioned this debate has sparked a newfound interest in timeless questions about the nature of intellectual property and how it should be protected including why do we protect intellectual property at all do we really have property rights in our intangible creations the same way we have property rights to our homes and our land aren t there better ways to encourage artistic creation and scientific discovery than through the use of copyright and patent laws that protect a limited monopoly copy fights presents a thought provoking exploration of these questions
