A World of Information

1973

the new edition of this major work offers a comprehensive analysis of international communication systems and the global flow of information hamid mowlana places the analysis of global mass media and other forms of communication within a critical overview of international and intercultural relations extensively rewritten and revised global information and world communication deals with the phenomenon of global information flow in all contexts political economic cultural technological legal and professional mowlana illustrates how different communication strategies and systems have contributed to the creation of powerful interests and have altered the global scene he takes into account recent events and shows how these have challenged basic assumptions and theories enabling the debate about communication and world society to embrace broader concepts of world politics information economy cultural ecology and international development

Global Information and World Communication

1997-02-24

this work explores how the might be used to deliver current easily accessible health information to adults over the age of 60 and their caregivers it considers how age related changes in vision cognitive function and motor skills impact on the delivery of health information

Older Adults, Health Information, and the World Wide Web

2001-11

this book takes a very broad view of information and considers it as a phenomenon in its own right rather than the technology for handling it it is very much concerned with the meaning of information and what we as individuals do with it

The World as Information

1999

this is the first attempt to delineate the synthetic field of the theoretical study of information treating information as the basic phenomenon on the fundamental level of the world encompassing nature technology individuals and society the exploration of information is done within info computational approaches to natural and social phenomena such as bioinformatics information physics informational chemistry computational physics cognitive and social sciences with special emphasis on interdisciplinary crossdisciplinary and transdisciplinary knowledge the book presents results of collaboration across research fields within info computational and info structural frameworks in attempt to better theoretically and conceptually capture the phenomenon of information and its dynamics such as computation and communication as they appear on different levels of organization on different scales and in different contexts

Theoretical Information Studies: Information in the World

2020

information overload is something that humans have dealt with for millennia during different historical eras massive increases in what was available to know has motivated the creation of systems for sorting indexing and compiling information as well as concerns that the abundance of information might cause cultural anxiety or even drive people to madness the digital age has renewed concerns about information overload and the detrimental effects it has on our ability to sort through the stream of online data decide what is most important or even to train our attention on it long enough to make sense of it in abundance pablo j boczkowski builds upon what we know about the historical and contemporary scholarship to develop a novel framework on the experience of living in a society that has more information available to the public than ever before focusing on the interpretations emotions and practices of dealing with this abundance in everyday life drawing on extensive fieldwork and survey research conducted in argentina abundance examines the role of cultural and structural factors that mediate between the availability of information and the actual consequences for individuals media politics and society providing the first book length account of information abundance in the global south boczkowski concludes that the experience of information abundance is tied to an overall unsettling of society a reconstitution of how we understand and perform our relationships with others and a twin depreciation of facts and appreciation of fictions

over one billion people use the internet globally psychologists are beginning to understand what people do online and the impact being online has on behaviour it s making us re think many of our existing assumptions about what it means to be a social being for instance if we can talk flirt meet people and fall in love online this challenges many of psychology s theories that intimacy or understanding requires physical co presence the oxford handbook of internet psychology brings together many of the leading researchers in what can be termed internet psychology though a

very new area of research it is growing at a phenomenal pace in addition to well studied areas of investigation such as social identity theory computer mediated communication and virtual communities the volume also includes chapters on topics as diverse as deception and misrepresentation attitude change and persuasion online internet addiction online relationships privacy and trust health and leisure use of the internet and the nature of interactivity with over 30 chapters written by experts in the field the range and depth of coverage is unequalled and serves to define this emerging area of research uniquely this content is supported by an entire section covering the use of the internet as a research tool including qualitative and quantitative methods online survey design personality testing ethics and technological and design issues while it is likely to be a popular research resource to be dipped into as a whole volume it is coherent and compelling enough to act as a single text book the oxford handbook of internet psychology is the definitive text on this burgeoning field it will be an essential resource for anyone interested in the psychological aspects of internet use or planning to conduct research using the net

Business America

1984

is the internet the key to a reinvigorated public life or will it fragment society by enabling citizens to associate only with like minded others online community has provided social researchers with insights into our evolving social life as suburbanization and the breakdown of the extended family and neighborhood isolate individuals more and more the internet appears as a possible source for reconnection are virtual communities real enough to support the kind of personal commitment and growth we associate with community life or are they fragile and ultimately unsatisfying substitutes for human interaction community in the digital age features the latest most challenging work in an important and fast changing field providing a forum for some of the leading north american social scientists and philosophers concerned with the social and political implications of this new technology their provocative arguments touch on all sides of the debate surrounding the internet community and democracy
