have you tried to learn shell scripting on your own but lack the structure you need to really improve your skills are you tired of picking up bits and pieces of information that you can t just seem to put together do you learn best by doing if so you re going to love this course one of the biggest complaints i hear from students is that most of the courses they ve taken in the past simply provide information without any context and without any idea of how to put that

information to use this course turns that old frustrating and
outdated way of learning on its head it s project based which
means that instead of learning bits and pieces of information
you ll write actual shell scripts that you can use in real
world situations you get the chance to immediately put what
you learn to use so that you fully understand and remember it
if you re ready to level up your shell scripting skills
