the gasoline direct injection system consists of sensors which detect the engine conditions the engine ecu which controls the system based on signals from these sensors and actuators which operate under the control of the engine ecu the engine ecu carries out activities such as fuel injection control idle speed control and ignition timing gdi stands for gas direct injection and refers to how the engine injects gas into the cylinders in any internal combustion engine fuel is sprayed into the air to create a mixture of fuel the wiring diagram mitsubishi 4g93 gdi is a detailed map of the
