market request we have created the third Australian edition of the US bestseller Chemistry: The Central Science. An extensive revision has taken this text to new heights, triple-checked for scientific accuracy and consistency. This edition is a more seamless and cohesive product yet retains the clarity, innovative pedagogy, functional problem solving, and visuals of the previous version. All artwork and images are now consistent in quality across the entire text and with a more traditional and logical organisation of the organic chemistry content. This comprehensive text is the source of all the information and practice problems students are likely to need for conceptual understanding, development of problem solving skills, reference, and test preparation.
