a tumultuous 1971 merger that combined all of the state's public colleges and universities into a single entity led to the creation of the university of wisconsin system drawing on decades of previously unpublished sources patricia a brady details the system's full history from its origin to the present illuminating complex networks among and within the campuses and an evolving relationship with the state the uw system serves as a powerful case study for how broad national trends in higher education take shape on the ground brady illustrates the ways culture wars have played out on campuses and the pressures that have mounted as universities have shifted to a student as consumer approach this is the essential unvarnished story of the unique collection of

institutions that serve wisconsin and the world and a convincing argument for why recognizing and reinvesting in the system is critically important for the economic and civic future of the state and its citizens

the inauguration of robert maynard hutchins as the fifth president of the university of chicago in 1929 coincided with a drastically changed social and economic climate throughout the world and hutchins himself opened an era of tumultuous reform and debate within the university in the midst of the changes hutchins started and the intense feelings they stirred william h mcneill arrived at the university to pursue his education in hutchins university he tells what it was like to come of age as a undergraduate in those heady times hutchins scathing opposition to the departmentalization of learning and his resounding call for reforms in general education sparked controversy and fueled debate on campus and off it became a struggle for the heart and soul of higher education and mcneill as a student and then as an instructor was a participant his account of the university s history is laced with personal

reminiscences encounters with influential fellow scholars such as richard mckee r s crane and david daiches and details drawn from hutchins papers and other archives mcneill sketches the interplay of personalities with changing circumstances of the depression war and postwar eras but his central concern is with the institutional life of the university showing how student behavior staff and faculty activity and even the hyde park neighborhood all revolved around the charismatic figure of robert maynard hutchins shaped by him and in reaction against him successive transformations of the college and the tribulations of the ideal of general or liberal education are central to much of the story but the memoir also explores how the university was affected by such events as red scares the remarkably successful round table radio broadcasts the abolition of big time football and the inauguration of the nuclear age under the west stands of stagg field in 1942 in short hutchins university sketches an extraordinarily vibrant period for the university of chicago and for american higher education it will revive old controversies among veterans from those times and may provoke others to reflect anew about the proper role of higher education in american society

David Ross Boyd stepped off the train in Norman, Oklahoma on August 6, 1892 and looked toward the southwest. There was not a tree or shrub in sight. Wrote the former Kansas school superintendent just hired to serve as the University of Oklahoma's first president: "Behind me was a crude little town of 1,500 people and before me was a stretch of prairie on which my helpers and I were to build an institution of culture. By 1895, five years after the university's official founding, the school boasted four faculty members: three men and one woman and 100 students. Today the campus is home to more than 30,000 students and 2,700 full-time faculty and is one of the most respected public universities in the nation with twenty-one colleges offering hundreds of majors at the bachelor's, master's, and doctoral levels. Our remarkable journey from that treeless prairie to its present standing as a world-class institution of learning unfolds in the sooner story arriving upon the university's 125th anniversary. The book updates a history that last

left off in 1980 when William Slater Banowsky was at the helm author Anne Barajas Harp examines the school's history through the lens of each presidential administration from the beginning of David Ross Boyd's tenure to the present moment in David Lyle Boren's presidency now in its third decade in describing what each president encountered in his turn she captures the unique character challenges and accomplishments of each administration as these reflect the university's growth and progress through the twentieth and early twenty-first centuries discouraged Boyd wrote at his arrival in 1892 not a bit the sight was a challenge the sooner story conveys the inspiration and excitement of meeting and renewing that challenge over the past 125 years

universities are being seen as key urban institutions by researchers and policy makers around the world they are global players with significant local direct and indirect impacts on employment the built environment business innovation and the wider society the university and the city explores these impacts and in the process seeks to expose the extent to which universities are just in the city or part of the city and actively contributing to its development the precise expression of the emerging relationship between universities and cities is highly contingent on national and local circumstances the book is therefore grounded in original research into the experience of the uk and selected english provincial cities with a focus on the role of universities in addressing the challenges of environmental sustainability health and cultural development these case studies are set in the context of reviews of the

international evidence on the links between universities and the urban economy their role in place making and in the local community the book reveals the need to build a stronger bridge between policy and practice in the fields of urban development and higher education underpinned by sound theory if the full potential of universities as urban institutions is to be realised those working in the field of development therefore need to acquire a better understanding of universities and those in higher education of urban development the insights from both sides contained in the university and the city provide a platform on which to build well founded university and city partnerships across the world
